

Instructions to install new PKI Component of SAIL (for SAIL users only)

1st Step:

Open Internet explorer

Then Click Tools >Click Internet Option> Click General > Click Delete Button under "Browsing History">Select all Boxes>Click Delete>Click OK Button.

2nd Step:

1. Login into your computer with user ID having Administrator Rights.
2. Open https://sailtenders.co.in/pki/mjunction_v3.htm - This will help you to download the component.
3. Popup blocker should be disabled. So please allow popup windows by selecting "Turn-Off Pop-Up Blocker" setting in the Tools menu. You can also check in the Tools menu => Internet Options => Privacy tab. Untick the box for "Block Pop-Ups".
4. Open Internet Explorer => Click on Tools menu => Click on Internet Options => Click on Security settings.
5. Please tick enable in the following options:
 - ✓ Allow previously used ActiveX controls to run without prompt=> Set as Enable
 - ✓ Allow Scriptlets=> Set as Enable
 - ✓ Automatic prompting of ActiveX controls=> Set as Enable
 - ✓ Download signed ActiveX controls => Set as Enable
 - ✓ Download unsigned ActiveX controls => Set as Enable
 - ✓ Initialize and script ActiveX controls not marked as safe => Set as Enable
 - ✓ Run ActiveX controls and plug-ins => Set as Enable
 - ✓ Script ActiveX controls marked safe for scripting => Set as Enable
6. Press OK button and close all the windows and also Internet Explorer.

For Trouble Shooting & cross checking that the component is properly downloaded or not:

1. Open (Internet Explorer) > Click on Tools menu > Click on Internet Options.
2. Click on Settings button under the General tab (Browsing History)>Click on (View Objects) button.
3. Please check if "mJunction_v3.NGDEMO" (for Windows XP OS) or "mjunction_v3.INF" (for Windows 7 OS) component is installed on your computer. (this file will be displayed in the list)
